## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 3, 4, 6-8, 10-18 are rejected under 35 U.S.C. 102(b) as being anticipated by Mok et al.

Mok et al disclose a printed circuit board (20) having at least one contact protuberance (32), an EMI shield member (10) formed with an aperture (26).

### ***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 2831

Claims 2, 5, 9 rejected under 35 U.S.C. 103(a) as being unpatentable over Mok et al

The teaching of Mok et al as discussed above does not disclose the specific shape of the contact protuberance. It would have been obvious to one having ordinary skill in the art at the time the invention was made to modify the shape of Mok et al by employing a specific shape, since more than a mere change of form is necessary for patentability. In re Span-Deck Inc. v. Fab-Con, Inc. (CA 8, 1982) 215 USPQ 835.
